🔍 **Work Progress Report**
Name: Hirwa Mihigo Honore
Position: Developer
Date: 10th September 2025

📝 **Introduction**
This report provides an update on progress made across **ABY Ride** and **ABY HR**, focusing on client dashboard improvements, support features, and backend enhancements with email API integration.

👨‍💼 **Task Focus**
● Develop client activity and support pages for ABY Ride.
● Enhance ABY HR backend with email API for employee registration notifications.

✅ **What Was Done**
On ABY Ride:
● Created a new page in the client dashboard to display **recent trips and activity history**.
● Designed and implemented a **support page** where clients can access help and raise issues.

On ABY HR:
● Integrated **Email API** into the backend for employee management.
● Configured system to automatically send emails to employees after registration.
● Email includes confirmation of successful registration and login credentials (password).

⚠️ Current Status
- Client activity and support pages are fully functional on ABY Ride.
- Email API integration on ABY HR backend is working as expected.
- Employee registration now automatically triggers email notifications.

📌 Next Steps
- Improve UI/UX design for the new client dashboard pages in ABY Ride.
- Add logging and monitoring for email delivery in ABY HR.
- Enhance security by implementing temporary passwords with reset functionality.
- Collect feedback from users and admins to refine features further.

📚 Summary
Significant progress was made today on both **ABY Ride** and **ABY HR**. On ABY Ride, a client dashboard page for recent trips and a support page were developed. On ABY HR, the backend email API was successfully integrated, enabling employees to receive confirmation emails upon registration with their credentials. These updates strengthen usability, support, and communication across both systems.
